Tasks:

- Every country measures temperature according to different scales. Being a scientist at the Temperature department it is your job to provide the reading according to all scales. Write a program to convert a **given temperature reading** (in Kelvin) to celsius and Fahrenheit.
- Your puppy dog grew much faster compared to your small brother. Confused, you went to the pet shop and the owner told that dogs age differently than humans. Write a program to convert given **Human years into Dog years**. (1 human year is equal to 8 dog years)

Duration : 2 days
